1 Document Version History

A change to the version history requires an update of date and version in the page header.

The numbering format is Revision.Version, where Revision is an official document release and Version exceeding 0 is an internal work document. Please note that only if the document version has suffix 0 it is an official SDC version, e.g 1.0, 2.0, 3.0, but NEITHER 0.1, 1.2 nor 1.10. The version suffix is initialized for each new revision level.

Version	Date	Description	Signature
3.0	15-12-15	Updated to align with version 3.0 of SDC Use Case A. Changed to use case version 3.0 on first page. In chapter 3 “Schemas in the Use Case” all document schemas now refer to the papiNet build 2015-04-13. There is now no text below the SDC logotype.	JeNo
2.0	15-01-05	Updated link of schemas papiNetCommonDefs and ShipmentStatus to the papiNet web site. All links now refer to the papiNet build 2014-11-07. Updated use case description and changed to use case version 2.0 on first page.	JeNo
1.0	14-06-11	First public version.	JeNo
0.1	14-02-13	First draft revision. Incomplete.	JeNo

2 Introduction

In order to exchange electronic information in a papiNet format, every XML document must refer to a papiNet schema. This document provides the link for downloading appropriate papiNet schemas at the official website of the papiNet organisation.

The schemas can be used to view the structure of documents and validate inbound/outbound papiNet documents.

SDC requires senders to **ONLY** use namespaced versions of papiNet schemas. SDC itself only uses namespaced versions in its documents.

3 Schemas in the Use Case

The schemas below can be downloaded at www.papinet.org/the-standard/download-current-version/ , at the official website of papiNet.

papiNetEnvelope

Filename: papiNetEnvelope.xsd

Version: 1.00 build Env_V1R00_20150413 or a later build.

BusinessAcknowledgement

Filename: BusinessAcknowledgementV2R40.xsd

Version: 2.40 build V2R40_20150413 or a later build.

DeliveryMessage

Filename: DeliveryMessageV2R40.xsd

Version: 2.40 build V2R40_20150413 or a later build.

ShipmentStatus

Filename: ShipmentStatusV2R40.xsd

Version: 2.40 build V2R40_20150413 or a later build.

In addition to the mentioned schemas, the papiNet standard requires the use of a separate schema with common definitions used in all schemas.

Filename: papiNetCommonDefsV2R40.xsd

Version: 2.40 build V2R40_20150413 or a later build.
